## Terms of Acceptance

When a patient seeks chiropractic health care and we accept a patient for such care, it is essential for both to be working toward the same objective. It is important that each patient understands both the objective and the method that will be used to attain it.

**Adjustment** – An adjustment is the specific application of forces that facilitate the body's correction of vertebral subluxation. Our chiropractic method of correction is by specific adjustments of the spine.

**Subluxation** – A misalignment of one or more of the 24 vertebra in the spinal column, which causes alteration of nerve function and interference to the transmission of mental impulses resulting in a lessening of the body's innate ability to express its maximum health potential.

We do not offer to diagnose or treat any disease or condition other than vertebral subluxation. However, if during the course of a chiropractic spinal examination, we encounter non-chiropractic or unusual findings, we will recommend that you seek the services of a health care provider who specializes in that area.

Regardless of what the disease is called, we do not offer to treat it, nor do we offer advice regarding treatment prescribed by others. *Our only practice objective is to eliminate a major interference to the expression of the body's innate wisdom.* Our only method is specific **adjustments** to correct vertebral subluxations.

I understand that I have the right to have all of my questions pertaining to the purpose of chiropractic care answered to my complete satisfaction prior to my first adjustment. I therefore accept any and all chiropractic adjustments on this basis.

If the patient is under the age of 18, I hereby authorize this clinic and its doctor(s) to administer care as they so deem necessary to my son/daughter/ward.
